

Ayush Bhardwaj

Software Engineer • Greater Noida, India • Open to Relocation
+91-7078035668 | sharmaayush726@gmail.com | LinkedIn | GitHub | Portfolio

Professional Summary

Results-driven Software Engineer with 2+ years of hands-on experience in backend development, microservices architecture, distributed systems, and production support. Skilled in Java 8/11/17, Spring Boot, Spring Security, Apache Kafka, Spring Data JPA, MongoDB, and AWS, with practical exposure to building and maintaining 10+ backend services across high-availability systems and troubleshooting live production issues. Possess a strong understanding of REST APIs, event-driven architecture, incident investigation, cloud deployment, and system reliability. Effective at collaborating with cross-functional engineering teams, diagnosing service issues, and supporting stable, scalable backend platforms.

Technical Skills

Languages: Java 8/11/17, Python 3, JavaScript (ES6+), SQL, HTML5, CSS3

Frameworks & Libraries: Spring Boot 2.x/3.x, Spring Data JPA, Spring Security, Hibernate, React

Databases: MongoDB, MySQL, SQL Server

Tools & Platforms: Apache Kafka, AWS (EC2, S3, Lambda), Apache Tomcat, Git, GitHub, Postman, Maven, Docker, VS Code, Eclipse

Core Concepts: REST APIs, Microservices Architecture, Distributed Systems, Backend Development, Production Monitoring, High-Availability Systems, Incident Management, Event-Driven Architecture

Networking: TCP/IP, OSI Model, DNS, DHCP, Routing and Switching, Network Monitoring, Network Troubleshooting

Professional Experience

Software Engineer

February 2024 – Present

Nexon Software Solutions (Client: Vonage)

Noida, Sector 59

- Engineered and maintained 10+ distributed backend services using Java 17, Spring Boot 3.x, Apache Kafka, and MongoDB to support scalable telecom applications and stable production workflows.
- Monitored backend services, internal components, and telecom APIs handling thousands of daily requests to maintain 99.9% high availability, operational reliability, and timely issue detection in production environments.
- Investigated 50+ production incidents using application logs, metrics, monitoring dashboards, and debugging tools to identify root causes and reduce mean time to resolution.
- Diagnosed and resolved backend service failures, API-level issues, request processing errors, and performance bottlenecks across 10+ microservices in a high-availability telecommunications environment.
- Supported the development, maintenance, and troubleshooting of backend integrations used in telecom-related workflows and service communication layers.
- Worked with Apache Kafka-based messaging and asynchronous processing flows to support event-driven communication between distributed services.
- Participated in deployment support, application monitoring, and operational validation for cloud-hosted services running on AWS EC2, S3, and Lambda.
- Collaborated with software developers, QA engineers, and support teams to investigate escalations, validate fixes, and improve production stability.
- Contributed to service reliability improvement by identifying recurring operational issues and supporting corrective actions for long-term system stability.
- Created and maintained 15+ operational runbooks, troubleshooting guides, and system documentation to streamline support processes and improve knowledge transfer across teams.
- Ensured adherence to backend quality practices, API behavior expectations, and production support standards in a client-facing telecom environment.
- Supported API request validation, payload inspection, and response debugging to improve reliability across interconnected backend services.
- Reviewed recurring production issues and service behavior trends to help strengthen system observability and reduce repeat failures.
- Participated in backend release support by validating deployment readiness, verifying application health, and assisting in post-release monitoring checks.
- Leveraged structured logs, monitoring signals, and service-level traces to analyze application behavior and accelerate troubleshooting in distributed environments.

Projects

Student Mess Management System | *Java 8, Spring Boot, Spring Security, Spring Data JPA, REST APIs, React, Stripe, Twilio, SendGrid*

- Architected and developed a full-stack web application for managing student meal operations, user records, and administrative workflows using Java 8, Spring Boot 2.x, and React.
- Built 5+ backend modules using Spring Boot for student registration, meal scheduling, billing support, record management, and reporting features.
- Designed and implemented 20+ secure and scalable REST API endpoints to support frontend integration and core business functionalities.
- Developed interactive frontend components using React to provide a user-friendly interface for students and administrators.
- Integrated Stripe for online payment processing to support digital fee collection and meal-related transactions.
- Integrated Twilio for SMS notifications and SendGrid for email alerts to improve communication and user engagement.
- Implemented JWT-based authentication and role-based authorization using Spring Security to secure user access, protect sensitive endpoints, and enforce fine-grained access control across the application.
- Used Spring Data JPA to manage database operations, entity relationships, and persistence workflows in the backend layer.
- Structured backend logic into reusable service components to improve code maintainability, simplify debugging, and support future feature development.
- Optimized database query patterns and request handling flows to improve application responsiveness and overall system performance.
- Tested REST API endpoints and backend workflows through validation-driven testing and manual verification to ensure functional correctness.
- Streamlined meal booking, payment tracking, and student record management into a single unified platform for improved usability and operational efficiency.

Education

Gautam Buddha University
B.Tech in Information Technology
• CGPA: 7.94

Greater Noida
March 2019 – October 2023

Saraswati Shishu Mandir College
Intermediate (PCM)
• Percentage: 80%

Muzaffarnagar
April 2016 – May 2018

Certifications & Achievements

Volunteered at an India Hackathon event organized by the Ministry of External Affairs, Government of India.
Certificate of Completion in the Android Ethical Hacking Professional (AEHP) course from Udemy.
